CAMPUS SUSTAINABILITY DAY V

Campus Sustainability Day (CSD) celebrates sustainability in higher education. On a designated day, usually in October, colleges and universities are encouraged to create events on campus and elsewhere that draw participants for the exchange of ideas and knowledge among faculty, staff, and students, from across all departments and disciplines, and even from across the campus “edge” between town and gown. This is the kind of integrated, comprehensive planning that is a major focus for members of the Society for College and University Planning, the parent organization of Campus Sustainability Day.

CSD is devoted specifically to the achievements of and challenges for the tens of thousands of students, faculty, and staff working to instill sustainability principles in higher education institutions and their surrounding communities.

October 24-25th marks our second consecutive Campus Sustainability Day conference here in St. Louis. This annual event fosters dialogue among post-secondary institutions across the region in an effort to promote systemic action congruent with sustainable community initiatives. Conference participants learn about practical resources for implementing change on their campus, and meet other individuals working on similar issues in the area.

Last year over five of the local higher education institutions were represented, and this year the event has grown into a two-day event. Both Maryville University and Saint Louis University agreed to host afternoon breakout sessions and new topics, including energy management, green dining, and carbon neutrality, have been added to expand our offerings.

“STL CSD 07” is made possible by a number of volunteers dedicated advancing sustainability on their particular school’s campus, as well as through the support of the US Green Building Council-St. Louis Chapter and the Missouri Botanical Garden’s EarthWays Center. The EarthWays Center promotes sustainability through environmental education and improving the built environment, and is proud to offer assistance and free counseling services for universities as they “go green.”

For more information about the EarthWays Center, please visit

Jenny Palmer, Maryville University
Sheena Rice, Missouri PIRG
Brian Schreiber, Aspen Waste Services

Campus Sustainability Day V

WEBCAST

Building a Durable Future:

Community, Campus, and Deep Economy

MARYVILLE AUDITORIUM
WEDNESDAY, 11:00—12:30PM

Could moving away from a national economy focused on unfettered growth toward local, “deep” economies provide a lasting and positive impact on our environment?

Environmentalist and author **Bill McKibben** will address how economics may be the key to a more sustainable future and the role colleges and universities can play to support “deep economies.”

In 1989, with the publication of his seminal work, *The End of Nature*, Bill McKibben was our early warning alert for the now widely-recognized problem of human-driven climate change. SCUP's webcast will, however, accentuate the positive, as does McKibben in his latest book (2007), *Deep Economy: The Wealth of Communities and the Durable Future*.

Norm Christopher (Director of Sustainability, Grand Valley State University) will describe Grand Valley State University's unique leadership position in western mid-Michigan's Community Sustainability Partnership, a coalition of more than 100 regional entities, including the City of Grand Rapids, Aquinas College, and Grand Rapids Community College, as viewed through the lens of *Deep Economy*.

Debra Rowe (president, US Partnership for Education for Sustainable Development; co-chair, Higher Education Associations Sustainability Consortium; senior advisor, Association for the Advancement of Sustainability in Higher Education; and senior fellow, Association of University Leaders for a Sustainable Future) will discuss the overall picture of higher education sustainability and provide some vignettes about campus-based work benefiting local communities and economies from a wide range of institutions and areas.

KEYNOTE WORKSHOP

Climate Change on Campus,

Presented by the National Wildlife Federation

MONSANTO ROOM
WEDNESDAY, 1:30—3:00PM

Thursday, October 25, 2007
SAINT LOUIS UNIVERSITY

REGISTRATION
10:30-11:00AM

First Floor, Allied Health Building

**MORNING ACTIVITY &
LUNCHEON**

11:00-12:30PM

SAINT LOUIS UNIVERSITY

*Please take a minute to consider the following as you participate in the
webcast, workshop, and afternoon sessions.*

***What is already being done to promote campus
sustainability at the college or university you work
with?***

***What would you like to see accomplished at your
school?***

***What are other schools doing that could be done on
your campus?***

***How does the concept of sustainability support your
school's mission statement?***

***What specific obstacles must be overcome to promote
sustainability at your school?***

***How would your school benefit from adopting a
sustainability policy?***
